

POLICY ON QUALITY, ENVIRONMENTAL PROTECTION AND EMPLOYEE HEALTH AND SAFETY

4 October 2018

Kaunas

FITSOUT UAB is an international provider of comprehensive, high value-added interior solutions for commercial spaces: stores, hotels, restaurant chains and other retail and service properties. In order to realize each client's design and architectural ideas, the company takes a carefully chosen project-based approach to furnishings production, using the latest technologies for wood, metal and acrylic processing and advanced process-management techniques.

The management of FITSOUT, in conducting operations and pursuing goals for quality, environmental protection and work safety, undertakes:

- to meet contractual obligations properly and on time;
- to respond rapidly to new needs that clients have;
- to use quality production materials and adopt advanced technologies;
- to work with suppliers that meet relevant quality and environmental standards;
- to continually enhance the effectiveness of management systems by involving employees in the improvement of processes for ensuring quality, environmental protection and employee health and safety;
- to reduce the amount of waste produced and ensure its proper handling;
- to always operate in keeping with commitments and legal requirements.

In performing these undertakings, FITSOUT's management will each year set goals for quality, environmental protection and work safety, designate measures and resources for pursuing those goals, and continually monitor the measures and goals.
